

Topic: Technology/Urbanization, Industrialization, and Social Change

Ety Rani
Assistant Professor
Sociology Discipline
Khulna University

Technology / Urbanization, Industrialization, and Social Change

- ▶ **Technology** is the application of scientific knowledge to the making of tools to solve specific problems. Technological advances such as automobiles, airplanes, radio, television, cellular phones, computers, modems, and fax machines have brought major advances and changes to the world. Indeed, 20th-century technology has completely—and irreversibly—changed the way people meet, interact, learn, work, play, travel, worship, and do business.
- ▶ Social change refers to any modification in established patterns of inter-human relationships and standards of conduct; from backdated to updated.

Technology /Urbanization, Industrialization, and Social Change (continue)
